Mavericks (2019)
Worlds Adrift (2017)

SIDE PROJECTS

GROWL

Portable 2D game engine written in
modern C++.
github.com/Bearwaves/growl

EOS4J

Java library providing bindings to Epic
Online Services.
github.com/Bearwaves/eos4j

TERMLOOP

A pure Go game engine for the terminal.
Provides a renderloop and tools for mak-
ing terminal-based games.
github.com/JoelOtter/termloop

KAJERO

Interactive notebooks for the web,
with clever graphing.
github.com/JoelOtter/kajero

I'm an experienced backend programmer, familiar with working in the cloud and at
scale, and also have experience in programming games and game engines.

EXPERIENCE

COMPANION GROUP | STAFF SOFTWARE ENGINEER

July 2024 - Present | London, UK

- Helped ship Gears of War: E-Day, a AAA title from The Coalition for Xbox and PC.

BEARWAVES | DIRECTOR

April 2016 - Present | London, UK

- Founder/director of Bearwaves Ltd., a four-person game studio.
- Built **Feud**, released in 2019 on PC and mobile.
- **Dave's Word Game** released in 2025 for mobile and PC. Built in **Growl**, our highly portable 2D game engine written in modern C++.

EMITWISE | SENIOR SOFTWARE ENGINEER

February 2022 - July 2024 | London, UK

- Worked on V2 of the Emitwise product, a platform to analyse and track carbon emissions and reductions.
- Foundational work on infrastructure, full-stack work in Go and Typescript, instrumental in setting up engineering processes and pipelines.
- Lots of Kubernetes, Helm, Terraform and AWS.

IMPROBABLE | SOFTWARE ENGINEER

September 2016 - January 2022 | London, UK

- Started working on WebTools team - working on full-stack web applications such as the Inspector. TypeScript, CSS & Golang.
- On Operate team, worked on various backend services and command line tools around authentication, account management and billing.
- On Worker team, worked on adding metrics to the core network layer of the SpatialOS SDK. Worked primarily with C/C++.
- On Production team, worked with partner game studios to build authentication and inventory services. Golang, C#, Docker, Kubernetes, Prometheus & PostgreSQL.
- Founding member of Online Services team. Helped to launch and scale Scavengers, a battle royale for PC and console.

VMWARE | SOFTWARE ENGINEERING INTERN

April 2015 - September 2015 | London, UK

- Worked on Hybrid DaaS team, building solutions for deploying and managing virtual desktops.

MOO | SOFTWARE DEVELOPMENT INTERN

July 2014 - September 2014 | London, UK

- Worked on the Digital Crew, maintaining a previous product and helping in the early development stages of a newer one.

EDUCATION

IMPERIAL COLLEGE LONDON | MENG COMPUTING

First-class Honours | September 2012 - June 2016
